Architectural Inventory – Fogo Island Town Buildings

Edited by: Juliet Lanphear

Field Research and Photography: Juliet Lanphear

Designed by: Tienne Johnson

Heritage NL

Introduction

This project was undertaken to provide the Town of Fogo Island with an architectural inventory of all the buildings owned by the town. When the Town of Fogo Island was created in 2011, with the amalgamation of 4 previous towns and a regional council, the new Town of Fogo Island inherited over 40 buildings. The ones currently owned by the town are included in this survey.

This architectural survey only includes buildings owned by the Town of Fogo Island and is not a compilation of all the heritage/historic buildings on the island.

Special Note on Tilting

The community of Tilting has been designated a Registered Heritage District by Heritage NL and as a National Historic Site of Canada by Parks Canada.

An excerpt from the Heritage NL website on the designation of Tilting as a Provincial Registered Heritage District:

Tilting is a continuing cultural landscape and is a rare example of an Irish Newfoundland outport in its combination of features. Many aspects of the 19th century layer of settlement are still in existence. The agglomerated settlement form of family neighbourhoods, reflecting earlier Irish settlement patterns, is still present and valued by many members of the community. Tilting possesses a near complete range of traditional buildings and spaces associated with the inshore fishery having the same interrelationships as in the 19th century. Tilting illustrates adaptations of Irish settlement patterns both in clusters of family neighbourhoods and in its garden layouts. It is also important as a prime example of a Newfoundland settlement involved with the family based inshore fishery. It has one of the best collections of inshore fishery related structures on the Island of Newfoundland and there are gardens, agricultural structures and a variety of traditionally made fences still in use in the community.

Marine Interpretation Centre Building #1 / Fishermen's Union Trading Company Premises RHS

TFII-003

Marine Interpretation Center Building #1, the Fishermen's Union Trading Company Premises Registered Heritage Structure, 2023. Front and side facade.

Photo by Juliet Lanphear.

The Fishermen's Union Trading Company Premises, also known as the Marine Interpretation Centre Building #1, is a provincial Registered Heritage Structure located on the shoreline on Harbour Drive in Seldom.

The Fishermen's Union Trading Company Premises was part of the Fishermen's Protective Union, founded by Sir. William F. Coaker. In 1908, William Coaker formed the first organized protest movement among Newfoundland fishers, the Fishermen's Protective Union (FPU). The FPU functioned in part as a cooperative, attempting to weaken merchants' monopoly on purchasing and exporting fish and selling supplies. This included opening stores under the Fishermen's Union Trading Company (FUTC) across Newfoundland. Built in 1913, this store in Seldom was the fourth branch opened to provide a cooperative for fishermen. It operated on a barter system basis where customers would receive winter provisions in exchange for their summer's catch of fish. The Trading Company in Seldom closed in 1978, but the building was reused and eventually, by 1997, was restored as the Fogo Island Marine Interpretation Centre.

Two main entrances in the front and rear of the building for road and water access, which allowed fishery activity to directly access the building from the harbour. The building displays a FU Trading Co. sign on the exterior and contains the original store features on the second floor

interior, including artifacts on display. Interesting architectural features of the building include a dormer window shaped like a three-sided bay on the right facade. The Fishermen's Union Trading Company Premises was designated a Registered Heritage Structure by Heritage NL in 2009.

Building Name	Marine Interpretation Centre Building #1 / Fishermen's Union Trading Company Premises RHS
Date Recorded	October 15 2023
Recorded by	Juliet Lanphear
Community	Seldom
Street Address	77-79 Harbour Drive
Postal Code	A0G 3Z0

General Architectural Information

Building Type	Single detached
Roof Type	Low pitch gable
Roofing Material	Asphalt single on second story, wood shingle on the bay dormer
Dormer Position	Cut through eave line
Dormer Type	Three sided bay
Exterior Sheathing	Narrow wood clapboard
Type of Construction	Nailed timber frame
Foundation Type	Above ground
Foundation Material	Wood Post
Storeys	2 ½
Plan	Rectangular facade

Architectural Details

Main Door Shape	Rectangular
Main Door Material	Wood panel
Door Trim/Decoration	Plain lintel
Main Entrance Location	Front facade
Stairs	Rear facade- Straight side & front
Porch Type	None
Typical Window Shape	Rectangular & Square
Typical Window Type	Single hung & fixed
Typical Panes	2/2 and nine pane fixed
Window Trim/Decoration	Plain lintel
Roof and Eaves Trim	"FU Trading Co. Ltd." sign band under eave

Alterations

External Lights added to the structure.

Marine Interpretation Centre Building #2 / Red Fish Store

TFII-004

***Marine Interpretation Center Building #2, Red Fish Store, 2023. Front facade.
Photo by Juliet Lanphear.***

Located in Seldom and also called the “Red Fish Store,” this building was built over 100 years ago. Used to store loose salt for salting fish, kerosene, and other fuels. Fisher’s would ship their dried salt fish to the store where it would be sorted into separate grades. The salt fish would be packed in barrels and stored on the second floor before being shipped to other markets.

Building Name	Marine Interpretation Centre Building #2 / Red Fish Store

Typical Window Type	Single hung
Typical Panes	1/1 and 2/2
Window Trim/Decoration	Plain lintel
Roof and Eaves Trim	Return on eaves, flag pole on rear gable peak

Marine Interpretation Centre Building #3 / Cod Liver Oil Factory
TFII-005

Marine Interpretation Center Building #3, Cod Liver Oil Factory, 2023. Front and side facade. Photo by Juliet Lanphear.

The Marine Interpretation Centre Building #3 is also known as the “Cod Liver Oil Factory.” Fishers would process the cod livers harvested from their fish into cod liver oil by storing them in drums and selling the oil to merchants. The oil was boiled to render out waste in the cod liver oil factory before being stored in holding tanks to be sold.

Typical Window Type	Single hung
Typical Panes	1/1 and 2/2
Window Trim/Decoration	Plain lintel
Roof and Eaves Trim	Return on eaves

Old Roman Catholic Schoolhouse Registered Heritage Structure and Municipal Heritage Site

TFII-007

***Old Roman Catholic Schoolhouse, 2023. (Above) front and side facade,
(bottom left) back and side facade, and (bottom right) interior of the schoolhouse.
Photos by Juliet Lanphear.***

The Old Roman Catholic Schoolhouse building is located on 4 Silver Street, among a cluster of historic ecclesiastical properties along Fogo's Main Street, including Our Lady of the Snows Roman Catholic Church, St. Andrew's Anglican Church and Cemetery, and Fogo United Church.

The schoolhouse was operated by Fogo's Roman Catholic parish as a grade 1-11 school from its construction in 1888 to 1969. The building displays Gothic Revival style elements including the steeply pitched roof, long multi paned windows, and a small front gable end porch. The porch has a wood panel door at each side, purportedly so that girls and boys would enter the school separately at delegated sides.

The Old RC Schoolhouse's steep roof, long windows, and white and green colour scheme is architecturally similar to the Our Lady of the Snows Roman Catholic Church, a historic connection between the two 19th-century Catholic buildings at the centre of Fogo's cultural landscape. The Old RC Schoolhouse was designated a Registered Heritage Structure by the Heritage NL in 2009 and as a municipal heritage site by the former Town of Fogo in 2008.

**Bleak House Registered Heritage Structure and Municipal Heritage Site
TFII-009**

Bleak House 2023. (Above) front and side facade, (bottom left) side and back facade, (bottom right) back facade. Photos by Juliet Lanphear.

Located on a hilltop along North Shore Road in the community of Fogo, Bleak House is a prominent landmark in the community. The house is an example of 19th-century merchant housing in outport Newfoundland and was owned by important Fogo merchant families, beginning with the Slades of Poole, England. Elaborate architectural elements include a rear gabled dormer window, 2-storey centre bay window on the front façade with a pediment, and decorative use of wooden clapboard. Throughout its history, Bleak House has undergone

several alterations, including an addition in the rear of the building and the replacement of a front porch with a central tower with a bay window and pediment.

It was constructed for brothers John, Robert, and David Slade, the great nephew of successful Poole merchant John Slade between 1826 and 1827. There is little known about the builder, 'John King', however the name was mentioned in ship logs around the time of construction. The house was described in 1834 as a three-storey building with an attached 'summer kitchen' which is one that is located at the back of a house to avoid heating the main house when cooking.

The Slade's were prominent merchants in Newfoundland during the 18th and 19th centuries, with family members having operations in Fogo, Twillingate, Trinity, and Battle Harbour, Labrador. After the Slades went out of business, John Woodhouse Owens, formerly Slade's bookkeeper, purchased the house and the business for him and his business partner Henry J. Earle in 1870 from Thomas and David Slade, executors of the will of Robert Slade Jr. The premises was mortgaged to John Widbourne, and continued after the dissolution of the Owen-Earle partnership in 1893. In 1896, the premises was reconveyed to Owen, and the following year, Earle purchased it. Earle ran a successful business and eventually was incorporated as Earle Sons and Company Ltd., operating until 1967 when the collapse of the fishery forced them to close.

In 1983, Bleak House was gifted to the Town Council of Fogo, and in the following year, some restoration work was completed by Katimavik, a Canadian youth organization. In December of 1985, Bleak House was designated a Registered Heritage Structure and was awarded money to go towards its restoration.

Today, Bleak House is open to the public as a museum, and welcomes visitors to learn about its history.

Alterations

Rear of the house was a later addition (date unknown).

Fogo United Church Registered Heritage Structure

TFII-011

Fogo United Church, 2023. (Above) front facade, (bottom left) back and side facade. Photos by Juliet Lanphear. (Bottom right) historical photo, post-1948, source unknown.

Fogo United Church is a wooden Gothic Revival church located at 52 Main Street, Fogo, NL. The church is located in proximity to several other ecclesiastical buildings, including St. Andrew's Anglican Church, Our Lady of the Snows Roman Catholic Church, and the Old RC Schoolhouse.

Methodism had been formally introduced in Fogo in 1862 with the arrival of preacher and missionary Thomas Fox. The population of Fogo was predominantly Anglican compared to the surrounding Notre Dame Bay region which had a flourishing Methodist population. In 1877, this church was built under Minister Thomas W. Atkinson, and was the third Methodist church on Fogo Island in 1877. The building was used for Sunday worship and church meetings before becoming a museum and a cultural centre. Since 1925 the church has been part of the United Church of Canada.

Fogo United Church is an outpost interpretation of the Gothic Revival architectural style, its steep pitched gable roof is accentuated with ornate bargeboard finials, placed on the front gable peaks. The Gothic arch windows have curved muntins and stained glass. The small transom window and moulded trim over the main door add definition to the front facade. The louvered bell tower, a later addition in 1948, is capped with a steep turret and finial. Prior to 1948, the bell was housed in an external bell house or campanile.

The Fogo United Church was designated a Registered Heritage Structure by Heritage NL in 1997.

Window Trim/Decoration	Plain lintel
Roof and Eaves Trim	Bargeboards, ornate finials on gable peaks

Marconi Wireless Interpretation Centre

TFII-012

Marconi Wireless Interpretation Center, 2023. Front and side facade. Photo by Juliet Lanphear.

Located at 15 Pickett's Road Extension in Fogo, the Marconi Wireless Interpretation Centre sits on a hill overlooking the community of Fogo. The Marconi Centre is also the starting point of the Lion's Den Trail, which goes through the resettled communities of Lion's Den, Locke's Cove, Shoal Tickle, and Eastern Tickle.

The original Marconi station was built in 1911, and operated for 22 years. It was the only wireless station between Cape Race and Belle Isle. The Marconi station, connected to an overland telegraph line, provided a communications link to mariners and was the main link to the Battle Harbour wireless station. The Marconi Wireless Interpretation Centre opened in 2007.

Experience Fogo Site

TFII-014-017

Experience Fogo Site, 2023. Buildings from left to right: TFII-014 (Building #1 Trap Store and Stable), TFII-015 (Building #2 Carpenter's Shop), and TFII-016 (Building #3).

The Experience Fogo site is located at 7-9 North Shore Road on land previously owned by the Slade and Earle merchant families and is located in proximity to Bleak House. Merchant Henry Earle donated the land for the building of a cottage hospital, which closed in 2004 after fifty-one years in operation.

Experience Fogo includes several modern interpretation buildings, including a trap store and stable, carpenter's shop, and washroom.

Dwyer Premises TFII-025

Dwyer Premises, 2023. (Above) Dwyer House front facade, (bottom left) rear and side facade from wharf, (bottom right) front and side facade. Photos by Juliet Lanphear.

Located on the eastern side of the harbour at 143 Main Street in Tilting, the Dwyer Premises consists of a house, store, flakes, shed, and a stage. The house was built by Vincent Bryan between 1890-1900 and was later purchased by Albert Dwyer in 1925. The layout is typical of Tilting's centre hall-type plan.

The stage is an original part of the Dwyer Fishing Premises and in 2000 won the Southcott Award for excellence in the preservation of the architectural heritage of Newfoundland and Labrador.

Reardon House
TFII-026

Reardon House, 2023. (Above) front facade, (bottom left) rear and side facade, (bottom right) side facade. Photos by Juliet Lanphear.

Located in Sandy Cove in Tilting, the Reardon House is the final remaining house in Sandy Cove. The Reardon House is currently used as an artist's residence, along with the Jenny Keefe house on Main Road in Tilting.

The Reardon House has several features of a traditional Tilting home, including narrow wooden clapboard, wide wooden window and door trims and wood roof shingles. The property was originally entirely fenced in for grazing animals.

Earlier owners include Jack Reardon and later Gerald Reardon, who used the house as a stable by removing the partitions on the first story and storing hay in the loft. In 2001, the Reardon House was restored by the Tilting Cultural and Recreation Society.

Lane House Registered Heritage Structure

TFII-028

Lane House, 2023. (Above) front and side facade, (bottom left) side facade with trim outlining the original roof line, (bottom right) close up of front facade showing diagonal clapboard. Photos by Juliet Lanphear.

Located on 23 Kelly's Island Road in Tilting, the Lane House was constructed circa 1840 by Irish immigrant Augustin MacNamara. The Lane House was designated a Registered Heritage Structure by the Heritage NL in 1994.

The Lane House was originally constructed in a saltbox style, with a two-room ground floor plan with back linhay, common for when the house was constructed. MacNamara was a cooper and built a spiral staircase using a method similar to constructing a wooden barrel. The second owner, Aneas Dwyer, raised the second storey, utilizing a centre hall floor plan in the second storey and adding decorative trim board and diagonal clapboard on the ground floor's exterior.

Building Name	Lane House Registered Heritage Structure
Date Recorded	October 15, 2023
Recorded by	Juliet Lanphear
Community	Tilting
Street Address	23 Kelly's Island Road
Postal Code	AOG 4H0

General Architectural Information

Building Type	Single detached
Roof Type	Steep gable
Roofing Material	Wooden shingles
Dormer Position	None
Dormer Type	N/A
Exterior Sheathing	Narrow clapboard. Decorative use of diagonal clapboard and trim boards on the ground floor to create a central stylist element.
Type of Construction	Undetermined
Foundation Type	Above ground/crawl space
Foundation Material	Wood post
Storeys	2 ½
Plan	Rectangular long facade

Architectural Details

Main Door Shape	Rectangular
Main Door Material	Unknown
Door Trim/Decoration	Plain flat
Main Entrance Location	Left gable end
Stairs	Stoop
Porch Type	None
Typical Window Shape	Square
Typical Window Type	Fixed
Typical Panes	4 panes and 2 panes
Window Trim/Decoration	Plain lintel
Roof and Eaves Trim	Return on the eaves

Old Post Office

TFII-029

Old Post Office, 2023. Front and side facade. Photo by Juliet Lanphear.

The Old Post Office in Tilting is located at Post Office Lane. Construction on the Old Post office began in 1907 and was completed the following year. It is a small building with a partial hip roof. It had a small waiting room, a storage room for coal, and an office.

Patrick Bryan was awarded the contract to build the new post office and Mr. Mark Foley was the main carpenter. The site chosen was on the back of the McGrath and Keough neighbourhoods. The first postmistress was Mrs. Isabell McGrath, and the final postmistress when the building was decommissioned in 1969 was her niece, Mrs. Nora Foley. After the Old Post Office closed, it had several owners, including Emmeline and Edward Cluett, who operated a small convenience store from the building called "Emmeline's Groceteria." Since then, the Old Post Office was operated as a storage shed and it is currently a museum.
